The interplay between local and national solutions

Birte Christensen-Dalsgaard State and University Library

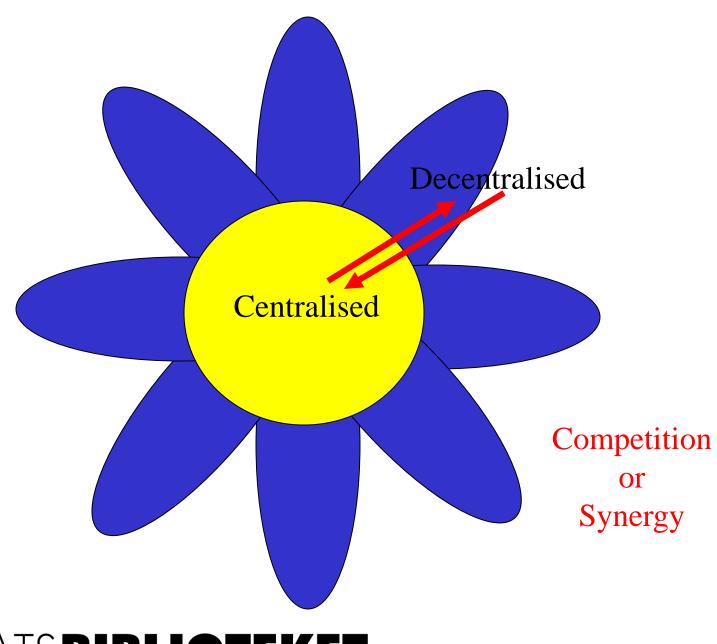

Outline of the talk

- Local National International
- Danish Electronic Library Local library
 - Journals
 - Subject Gateway
 - Catalogue
- Development approach of SB
- Summary

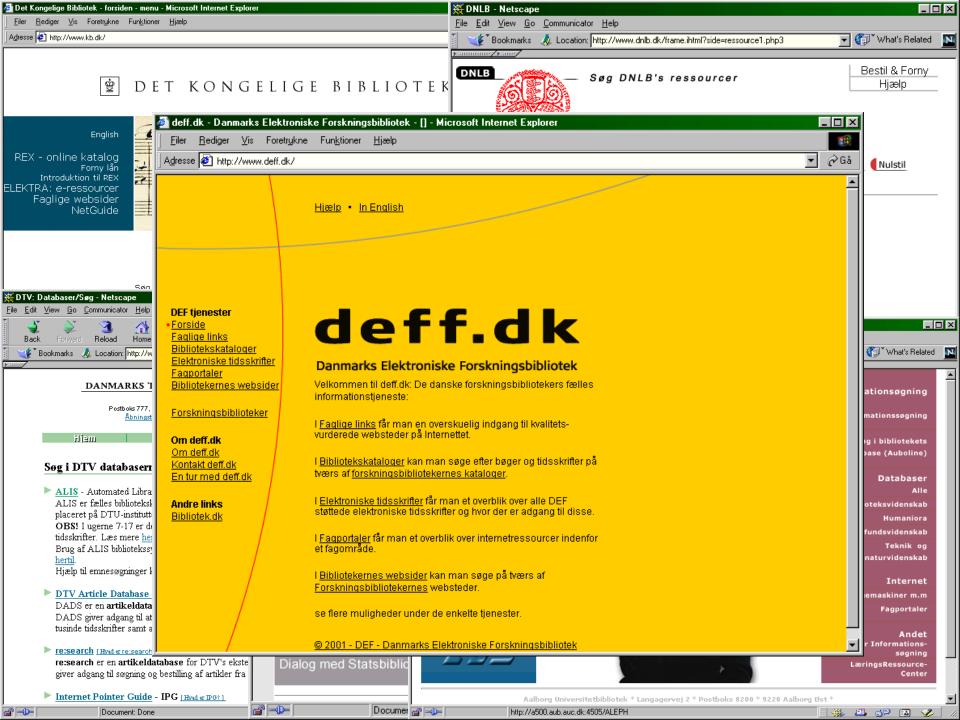

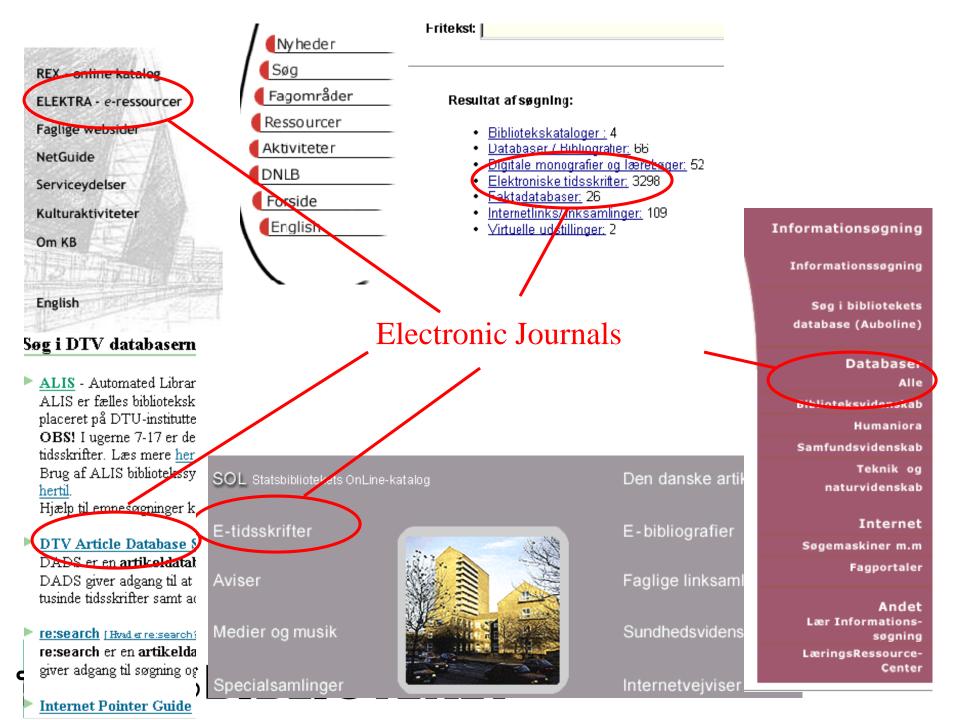

Interplay between local and national...

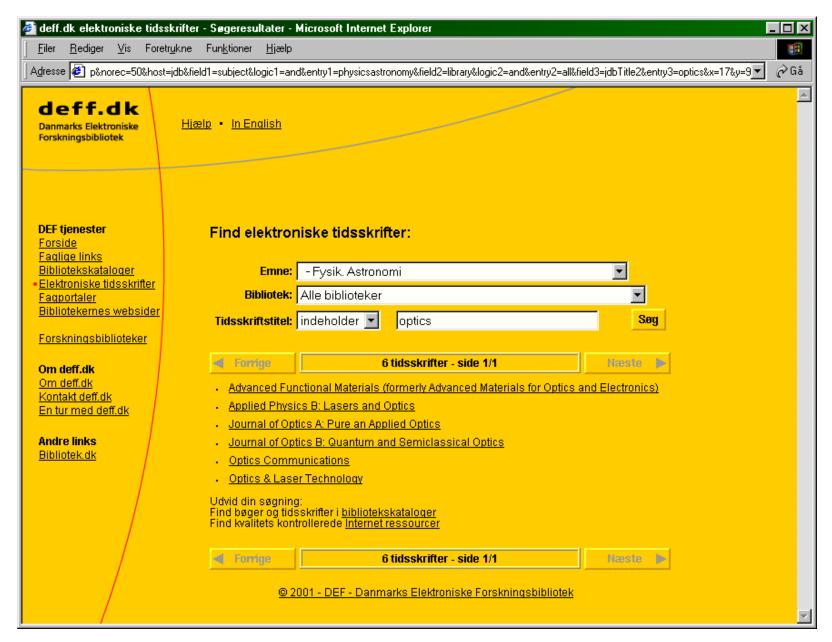

- SB ⊂ Danish Electronic Library ⊂ International
- SB ⊂ ALM institutions
- SB ⊂ Aarhus university ⊂ Danish Virtual University

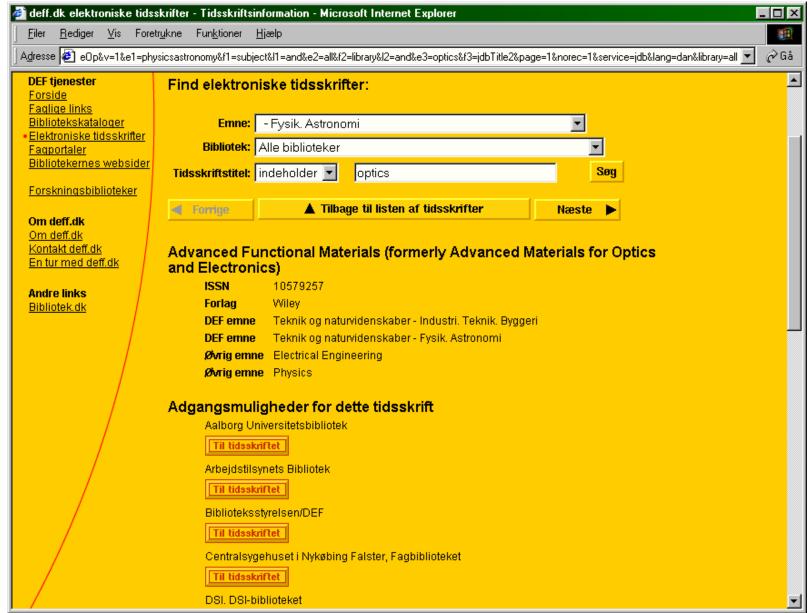

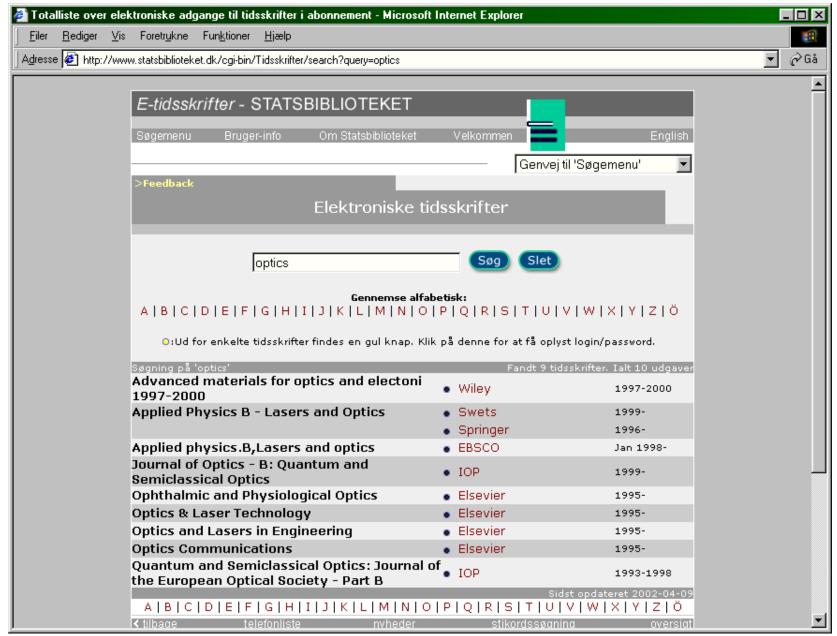

Maintenance of data

- A data object should be created once
- Don't overlap work on maintenance
- Optimise maintenance

 \Rightarrow

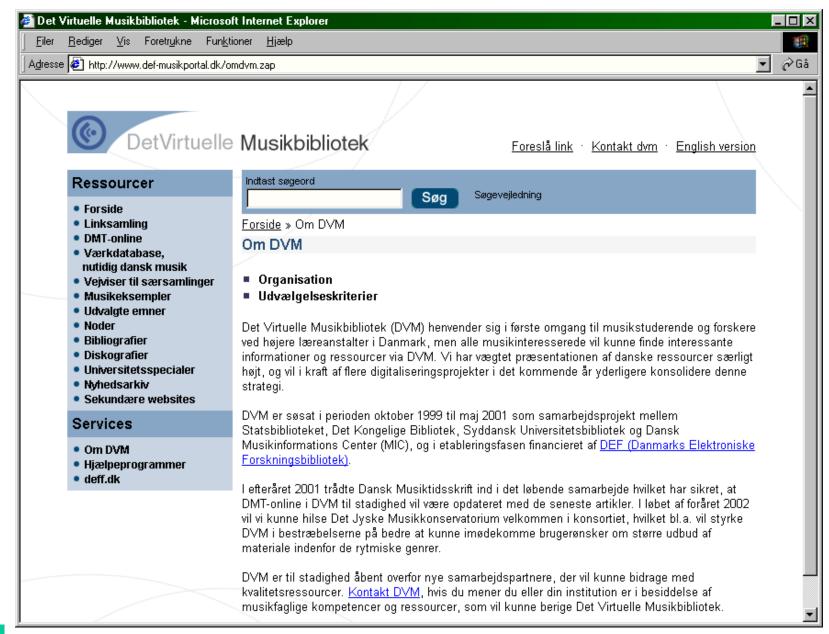

- User data should be maintained locally (LDAP)
- Bibliographical data created centrally
- Administrative data should be maintained locally
- On-line subscription data maintained centrally

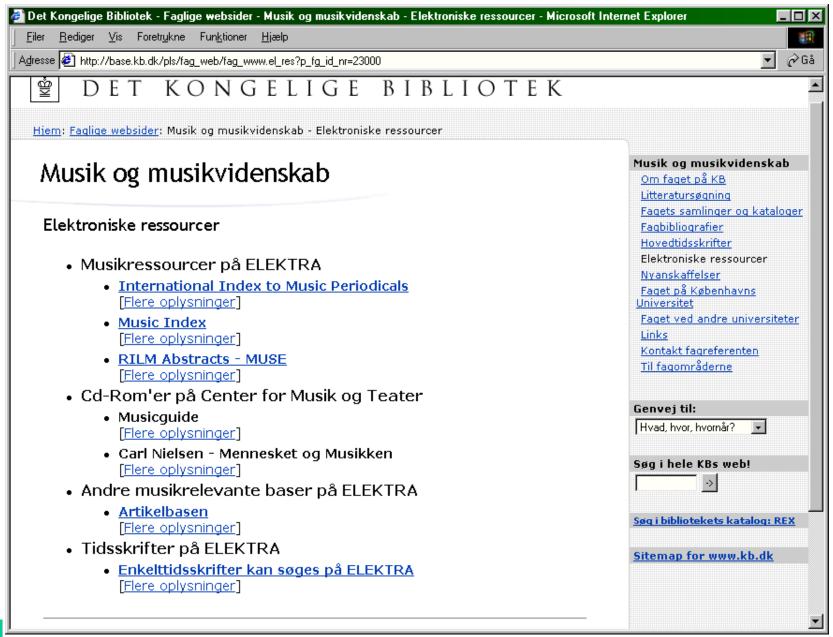

Budget

- National
- University
- Library

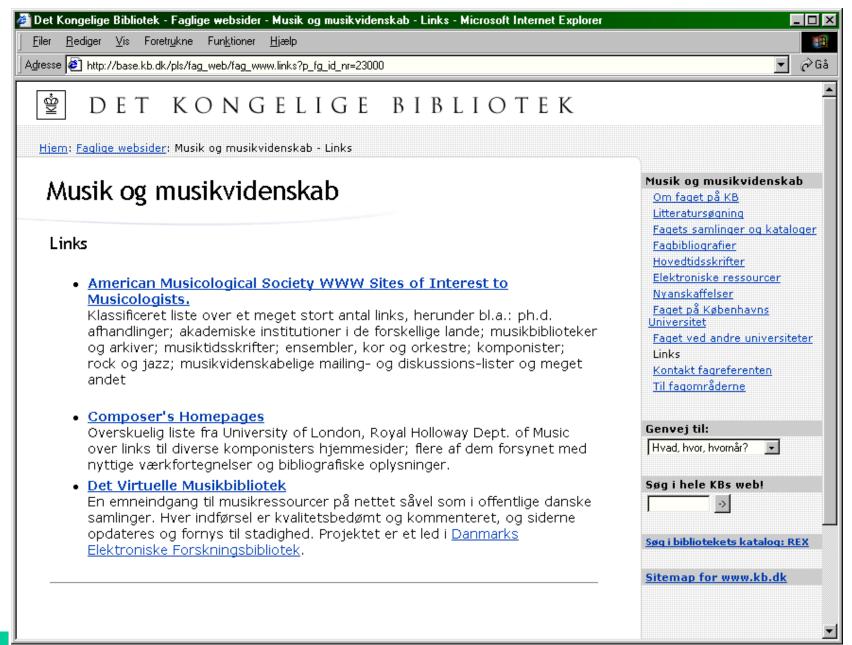

Subject gateways

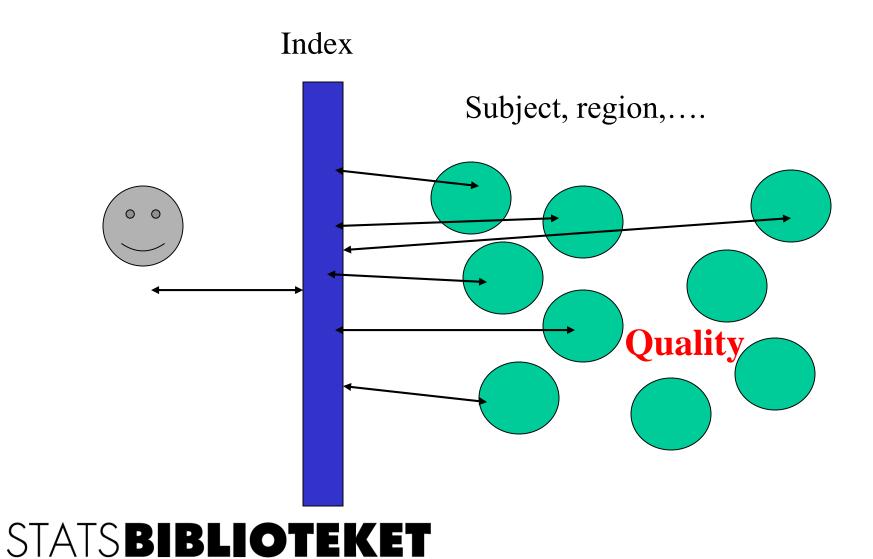

- Service tailored to user community but
- Do we all need to select and classify resources?

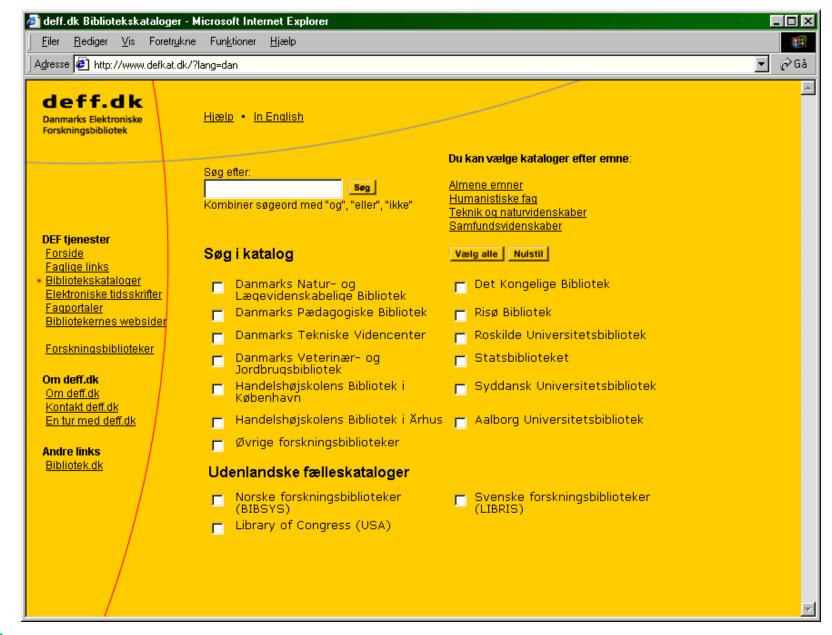

Alternative methodologies

- technical (e.g. OAi)
- organisational (how do we split the work
 - if we need to do it)

Responsetime

SB development - Web

- User- and library involvement
 - Focus on different needs of different target groups
 - Shared components if possible
- Technical platform
 - J2EE
 - Open Source (JBOSS and TOMCAT)
 - Portlets (Jetspeed)

Common Services

- Links subjectgateways
- (Electronic) journals
- Education
- Search engines
- Webvise- and similar
- DEF-key (LDAP)
- etc.

Summary

- Optimise relative to object and its description (-> central)
- Optimise maintenance of data (-> local)
- Customise relative to target group, user involvement
- Delivery time is a parameter
- Money flow has to be taken into account
- Quality has to be guaranteed
